

Script(6-8)

Slide 6

From the graph, it's clearly visible that how distribution of price varied with the count as with the minimum price, count was the highest and it gradually declined with increase in price.

Another thing to be noted is that though all course earned money in the market but beginner level had highest among expert and intermediate level.

Graph, **Revenue Made By Subject**, depicts the highest interest of users in Web development course and hence this course among all other courses made highest revenue.

Slide 7

From the graph, it can easily be noted that number of Subscribers and Reviews are highest for unpaid courses rather than for paid ones. It shows that users considered free courses over paid ones.

Another thing to be noted in graph,**Paid Courses**,is that paid courses have highest number of lectures and reviews.

Slide 8

From the graph, we can see that most users prefer the courses to have less content duration .

In another graph,its clearly visible that number of reviews increases with increase in number of subscribers and hence graph depicts linear relation between Reviews and Subscribers .
